About Vetvice Barn Design

Vetvice Barn Design is a leading consultancy on designing dairy barns for cow wellness, labor efficiency and sustainable milk production. Cow longevity is the key word in the way of thinking of all Vetvice consultants. The independent experience with robotic milking and sensor technology of the Vetvice group is highly appreciated by companies and producers. The Vetvice group consults and trains dairy farm staff on save and efficient working procedures. Vetvice Cow Signals Company trains dairymen and their advisors worldwide, in the areas of Cow Signals and preventive management and labor efficiency. Vetvice is active in over 35 countries with a team of 6 veterinarians, 2 agricultural engineers and 1 office manager.
